If you are thinking of upgrading from black and white to colour and are looking for top flight print, copy, scanning and fax capabilities, without having to compromise on quality and costs, the Olivetti d-Color MF25 multi-function digital system is the solution for you. With features such as an innovative polymer-based toner and a sophisticated print controller, including the PCL 5c, PCL 6c and Post Script3 languages, you will be able to reproduce extremely clear and brightly coloured text and images at a speed of 25 ppm, with a print resolution of 1800x600 dpi (interpolated).

The system is equipped with a 100-sheet bypass tray and has a standard feed capacity of 850 sheets that can be expanded to 3,350; it also features an optional automatic duplex unit.

A generous 40GB hard disk, combined with a powerful 1,024MB memory, turn the d-Color MF25

into a real document server, ready to meet the needs of all of your network users.

With the box utility function, it is possible to record up to 1,000 users with access via use of a name and password; each box is transformed into a storage area for your work. All copy, print, scanning and fax jobs will be always available and can be accessed with maximum security. You can also scan any hard-copy documents, transmitting them over a network via e-mail, FTP or SMB. Large documents can be scanned in several batches and combined in a single PDF. The Olivetti d-Color MF25 also offers a wide range of fax functions.

The Super G3 fax is available as option; there is also the option of a second dedicated line. The fax promotes trouble-free confidential transmission and reception, transmission from memory, broadcasting, polling and network transmission from your PC.
